

**Anexo 3.** Tabela contendo os dados referentes à classificação taxonômica dada pelos operadores MAP (Id MAP), pelos observadores de biota com seu respectivo número de planilha (Id OB / CHP), o tipo de som detectado (SD), a qualidade dos sons tonais registrados (ST), sejam eles assóvios (ASV), canto (CNT) ou unidades de canto (UC), bem como a qualidade dos estalidos (CLIQ), a qualidade dos sons explosivos registrados (SE) e a qualidade geral do registro acústico, sendo Q1 os registros de melhor qualidade. Os registros acústicos assinalados com asterisco (\*) referem-se àquelas detecções nas quais não foi possível obter o registro acústico.
